* Specifications for the 0-40 & 5-20 diameters are independent from the REMINC standard and are listed here for reference purposes only.

Description	Trilateral thread-rolling screw with extra wide spacing between 48° profile threads; twin lead threads with a 1-2 thread point taper.	
Applications/ Advantages	Thermoplastics, engineering resins and certain thermosets. Sharper thread profile increases holding strength while reducing material displacement. Drive and strip torques are higher, reducing the need for inserts or reinforcing clips.	
Material	<i>Steel</i>	<i>Stainless</i>
	AISI 1022 steel	18-8: 18-8 stainless steel 410: 410 austenitic stainless steel
Heat Treatment	Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.	410 SS: An ideal method of hardening 410 stainless screws is a bright hardening process, which typically involves a vacuum furnace. Another key factor affecting hardness is the chemistry of the fastener--most elements have maximum values but not minimums. This fact can contribute to hardness variance. 18-8 is only hardenable by cold-working.
Case Hardness	Rockwell C45 minimum	-
Case Depth	No. 2 thru 6 diameters: .002 - .007 No. 8 thru 10 diameters: .004 - .009 1/4" diameter: .005 - .011	-
Core Hardness	<u>Core:</u> Rockwell C28-38 (after tempering)	18-8: Rockwell B90 - C20 (approx.) 410: Rockwell C38 - 46 (approx.)
Plating	Various finishes with wax coating (see Appendix-A)	Stainless thread rolling screws are supplied passivated & waxed.

Description	Trilobular thread rolling screw. As each lobe of the screw moves through the pilot hole in the nut material, it forms and work-hardens the nut thread metal, producing an uninterrupted grain flow.	
Applications/Advantages	For drilled, punched or corrod holes in all ductile metals and punch extruded metals. Eliminates chips, requires low drive torque and provides excellent resistance to vibrational loosening.	
Material	Steel	Stainless
	Steel thread rolling screws shall be made from cold-heading steel conforming to the following chemical composition: Carbon: 0.13-0.27%; Manganese: 0.64-1.71%	18-8: 18-8 stainless steel 410: 410 austenitic stainless steel
Heat Treatment	Screws shall be quenched in liquid and then tempered by reheating to 650°F minimum.	410 SS: An ideal method of hardening 410 stainless screws is a bright hardening process, which typically involves a vacuum furnace. Another key factor affecting hardness is the chemistry of the fastener--most elements have maximum values but not minimums. This fact can contribute to hardness variance. 18-8 is only hardenable by cold-working.
Case Hardness	Rockwell C45 minimum	-
Case Depth	2-56 through 6-32 diameters: .002 - .007 8-32 through 12-24 diameters: .004 - .009 1/4-20 diameter & larger: .005 - .011	-
Hardness	Core: Rockwell C28-38	18-8: Rockwell B90 - C20 (approx.) 410: Rockwell C38 - 46 (approx.)
Plating	See Appendix-A for information on the plating of Taptite® II screws.	Stainless thread rolling screws are supplied passivated and waxed.

THE KANEBRIDGE ADVANTAGE

Over 43,000 Items

Kanebridge is a master distributor with over 43,000 items in inventory, including over 9,600 Stainless Steel and 1,800 Military fasteners.

Order By Credit Card

We accept Visa, MasterCard, Discover and American Express for new sales orders and outstanding balances.

Same-Day Shipping

Online orders placed by 5PM ship the same day via UPS. Online orders placed by 4PM ship same-day via FedEx. Same-Day Shipping guarantees can be impacted by carrier schedules, weather, and order volume. In all conditions our record for same-day shipping remains exceptionally high. Check our website for the latest updates on this policy.

Free Certifications

Chemical & Physical certifications are available on all Thru-Hardened parts and all items made to Military Specifications. We also keep all certifications on file and properly archived. Access any certification anytime you need it at no charge.

Fastener Specifications Guide

Kanebridge's newest 6th edition of its Fastener Specification Guide is available from stock in all 3 of our branches. This hard cover reference volume is the most comprehensive and up-to-date collection of fastener specifications Kanebridge has ever offered. The Specification Guide can also be accessed online at www.kanebridge.com.

No-Fault Return Policy

We have a no fault 60 day return policy and accept returns of full carton quantities for any reason. Returns may not be accepted after 60 days. Restock charge may apply after 30 days. Non-cancel/non-return orders are exempt from this policy. Returns should be in their original boxes and must not be mingled. **Thru-Hardened or Military-Grade fasteners will not be accepted unless returned in their original box(es).**

99% Service Level

99% of the items listed in this catalog are available from stock every day from one of our three warehouses located coast to coast: New Jersey, Illinois, and California.

Traceability

Lot control is maintained on all items in our inventory.

Drop-Shipping

Kanebridge can ship orders directly to your customer with a packing list and shipping label that show you as the vendor. Combine with our Custom Label service for a simplified method of shipment.

Custom Labeling

Streamline your receiving operations by letting Kanebridge affix custom labels to each box in your order. Include any information you need; Part Number, Part Description, Lot Number and Country of Origin in alphanumeric and/or bar code formats.
